

BMW Plant Hams Hall

2014 Apprenticeships

Location: BMW Plant Hams Hall, Coleshill, North Warwickshire
Job Overview: Four Year Maintenance Technician Apprenticeship

The engine production facility at Hams Hall is the first BMW engine plant to be built outside of Germany and Austria, recognising the importance of the UK as a major world economy and the BMW Group's third largest market.

BMW Plant Hams Hall plays a crucial role in BMW Group's international production network as the centre of competence for production of all four-cylinder petrol engines for both BMW and MINI.

BMW Group is a global organisation, designing and manufacturing motor vehicles of the highest quality, including highly acclaimed engines produced at BMW Plant Hams Hall. As a major international company we are proud of our investment in people and we are currently seeking Maintenance Technician Apprentices to join us in September 2014.

BMW Technical and Maintenance teams are vitally important in all areas of our business. They are responsible for the rapid detection, rectification and prevention of facility faults, including the operation and programming of highly automated production and plant equipment.

Training:

As a BMW apprentice you will be attending college on a block and day release basis and will undertake work based placements at BMW Plant Hams Hall. Training includes the study of modern technology, state-of-the-art engineering production techniques and processes. A typical four year programme comprises:

- Year 1: Full time attendance at college undertaking NVQ level two in Performing Engineering Operations, Functional Skills and year 1 of Engineering BTEC.
- Year 2: Day release at college undertaking year 2 of Engineering BTEC, work based placements and NVQ Level 3.
- Year 3: Day release at college undertaking year 1 of Engineering Foundation Degree, work based placements and NVQ Level 3.
- Year 4: Day release at college undertaking year 2 of Engineering Foundation Degree, work based placements.

Progression at each stage of your academic programme is dependent upon personal performance.

We currently work with Birmingham Metropolitan College, James Watt Campus, Great Barr, Birmingham.
